

Optics Question Set 4
Ray Diagrams for Convex Lenses

1. Draw a ray diagram for each of the following objects in a convex lens and use the ray diagram to answer the following questions about the image
- Is the image smaller, larger, or the same size as the object?
 - Is the image real or virtual? How do you know?
 - Is the image upright or inverted?

- Real image
- Same size
- Inverted

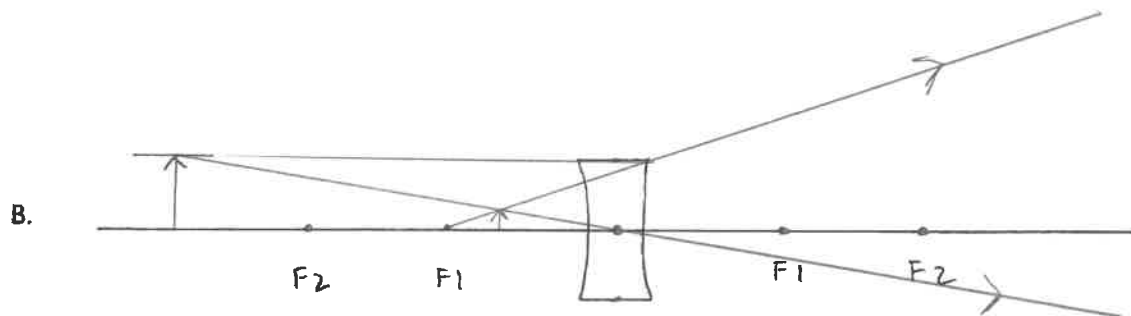

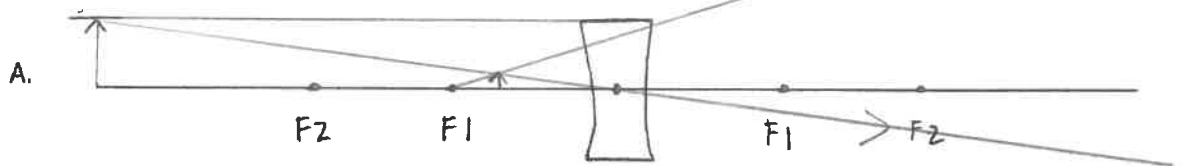

- Virtual image
- Larger
- Right side up.

Optics Question Set 5
Ray Diagrams for Concave Lenses

1. Draw a ray diagram for each of the objects (arrows) in a concave lens and use the ray diagram to answer the following questions about the image
- Is the image smaller, larger, or the same size as the object?
 - Is the image real or virtual? How do you know?
 - Is the image upright or inverted?

- Smaller
- virtual
- upright

- Smaller
- upright
- virtual
