

Grade Eight Science
Magnetism and Static Electricity Criterion B Assessment Completion Schedule

WRITING OF CRITERION B (SUMMATIVE):

Class	Task
1	• Come up with a demonstration on magnetism or static electricity • Select 3 or 4 appropriate materials for your demonstration • Practice the demo to see if it works (20 mins) • Write the research question • Write the hypothesis • Conduct research to write the background information • Start writing the background information (Don't forget your in-text citations) (30 mins)
2	• Finish writing the background information (Don't forget your in-text citations) • Assign the variables with method of measurement and method of control • Write the materials list
3	• Write the method (don't forget to put it in past tense) • Finish any unfinished items from classes 1 to 4 • Proof read and edit your Criterion B assessment • Submit your Criterion B assessment on Google Classroom

FORMATIVE PRESENTATION:

• After the three classes above are finished, each student will informally present their demonstration to the class
• We will have three presentations to start each class before the lesson until all presentations are finished
