

## **Grade Eight Science - Body Systems Written Assessment Checklist**

### **Anatomy:**

1. Know what the nervous system is and what parts make up the nervous system (brain, spinal cord, nerves, neurons)
2. Know what the digestive system is and know the anatomy and functions of the digestive organs that make up the digestive systems of: humans, earthworms, hydra. Also, know what peristalsis means.
3. Know what the respiratory system is, what parts make up the respiratory system, and the functions of each part
4. Know what the circulatory system is and know what the following parts of the circulatory system are responsible for (veins, arteries, capillaries, chambers, the heart, valves)
5. Know that muscles are important in the digestive, circulatory and respiratory systems and be able to give some examples of how they are used

### **System Connections:**

1. Understand connections between the following systems: nervous, respiratory, circulatory, digestive (for example: think of systems that have anatomical parts in common, systems that perform physical and chemical processes, the jobs of different parts in each system, surface area, diffusion)
2. Understand the difference between physical and chemical changes (physical and chemical digestion) as these apply to different types of digestion

### **RESOURCES TO STUDY:**

- Visit the Google Classroom. Under the Classwork Tab, you will find a Google Slides presentation of notes that will help you prepare

### **MYP ASSESSMENT CRITERIA:**

- MYP Criterion A - posted below
- MYP Command Terms that will be used on the assessment - posted below

## MYP ASSESSMENT CRITERIA:

### Criterion A: Knowing and Understanding

| Achievement Level | Level Descriptor                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 0                 | The student does not reach a standard indicated by any of the descriptors below                                                                                                                                                                                                                                                                                                             |
| 1-2               | The student is able to: <ul style="list-style-type: none"> <li>● <b>recall</b> scientific knowledge</li> <li>● apply scientific knowledge and understanding to <b>suggest solutions</b> to problems set in familiar situations</li> <li>● <b>apply</b> information to make <b>judgments</b></li> </ul>                                                                                      |
| 3-4               | The student is able to: <ul style="list-style-type: none"> <li>● <b>state</b> scientific knowledge</li> <li>● <b>apply</b> scientific knowledge and understanding to <b>solve problems</b> set in <b>familiar situations</b></li> <li>● <b>apply</b> information to make <b>scientifically supported judgments</b>.</li> </ul>                                                              |
| 5-6               | The student is able to: <ul style="list-style-type: none"> <li>● <b>outline</b> scientific knowledge</li> <li>● apply scientific knowledge and understanding to <b>solve problems</b> set in <b>familiar situations</b> and suggest solutions to problems set in unfamiliar situations</li> <li>● <b>interpret</b> information to make <b>scientifically supported judgments</b></li> </ul> |
| 7-8               | The student is able to: <ul style="list-style-type: none"> <li>● <b>describe</b> scientific knowledge</li> <li>● <b>apply</b> scientific knowledge and understanding to <b>solve problems</b> set in <b>familiar and unfamiliar situations</b></li> <li>● <b>analyze</b> information to make <b>scientifically supported judgments</b></li> </ul>                                           |

### Feedback/Communication of Achievement

| Descriptor                      | Emerging (Needs Improvement) |         | Developing (Satisfactory) |         | Proficient (Good) |         | Mastery (Excellent) |          |
|---------------------------------|------------------------------|---------|---------------------------|---------|-------------------|---------|---------------------|----------|
| Achievement Level (During Term) | 1                            | 2       | 3                         | 4       | 5                 | 6       | 7                   | 8        |
| Percentage (At Reporting Time)  | 0-39%                        | 40%-49% | 50%-62%                   | 63%-75% | 76%-82%           | 83%-89% | 90%-95%             | 96%-100% |

**MYP Command Terms that are used on this assessment:**

|                                                                                                       |                                                                                                                                                                                  |
|-------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Recall:</b><br>Remember or recognize from prior learning experiences                               | <b>Outline:</b><br>Give a brief account or summary                                                                                                                               |
| <b>State:</b><br>Give a specific name, value, or other brief answer without explanation of calculator | <b>Describe:</b><br>Give a detailed account or picture of a situation, event, pattern, or process                                                                                |
| <b>Apply:</b><br>Use knowledge and understanding in response to a given situation                     | <b>Interpret:</b><br>Use knowledge and understanding to recognize trends and draw conclusions from given information                                                             |
| <b>Suggest:</b><br>Propose a solution, hypothesis, or other possible answer                           | <b>Analyze:</b><br>Break down in order to bring out the essential elements or structure (To identify parts and relationships and to interpret information and reach conclusions) |
